1. INTRODUCTION

In the programme period 2014-2020, there is a strong focus on result-orientation for programmes funded from the European Structural and Investment Funds (ESIF). According to the European Commission (EC), programme evaluations in the past mostly focused on management and implementation issues and in most cases did not provide a proper understanding of what was achieved with the funding in the respective programme area. Therefore, the focus of programme evaluation lies on impact evaluation and on demonstrating the contribution to achieving the set objectives.

The Evaluation Plan of the Cooperation Programme Interreg V-A Slovenia-Hungary was developed in compliance with provisions of the following regulations:

- Common Provision Regulation (CPR) Regulation (EC) No 1303/2013, in particular Preamble 54 and Articles 50, 54, 56, 110 and 114,
- European Territorial Cooperation (ETC) Regulation Regulation (EC) No 1299/2013, in particular Preamble 26 and Article 14,

and the Commission guidance documents on Monitoring and Evaluation¹ and on Evaluation Plans².

According to the above mentioned regulations, the evaluations should serve to assess and improve the effectiveness and efficiency of the programme as well as its impacts. The Evaluation Plan is a strategic document that sets out the evaluation strategy for the entire implementation period of the programme in the period 2014-2020, taking into account lessons learnt from evaluations made in the previous programme period and the budgetary framework. The present Evaluation Plan defines the objectives of the evaluations and sets their framework.

According to the regulations, the Evaluation Plan shall be drawn up by the Managing Authority (MA) and submitted to the Monitoring Committee (MC) no later than one year after the adoption of the programme. The Cooperation Programme Interreg V-A Slovenia-Hungary was adopted by the EC on 18 September 2015. The present Evaluation Plan was drafted by the MA with the assistance of the Joint Secretariat (JS) and approved by the MC via written procedure on 5 September 2016. Following its adoption, it will be sent to the EC for information through the System for Fund Management in the European Union (SFC). The Evaluation Plan is a public document, prepared and adopted in English language, and will be available on the programme website www.si-hu.eu.

Progress in the implementation of the Evaluation Plan as well as the outcomes of the evaluation activities will be reported in the Annual Implementation Reports (AIR). By 31

http://ec.europa.eu/regional policy/sources/docoffic/2014/working/evaluation plan guidance en.pdf.

¹ Guidance Document on Monitoring and Evaluation - European Regional Development Fund and Cohesion Fund, Concepts and Recommendations (March 2014):

http://ec.europa.eu/regional_policy/sources/docoffic/2014/working/wd_2014_en.pdf.

² Guidance Document on Evaluation Plans (February 2015):

December 2022, the MA will submit to the EC a report summarising the findings of evaluations carried out during the programme period.

This plan sets out the minimum evaluation activities. Should it become evident during the programme implementation that additional evaluation activities would be necessary to better meet the evaluation objectives; this plan might be adapted on the initiative of the MC or MA.

2. OBJECTIVES AND COVERAGE

2.1 Evaluation objectives

The CP Interreg Slovenia-Hungary aims at "becoming an attractive area for living, working, investing, undertaking trough better capitalizing on existing natural and cultural assets in tourism". In order to support this result orientation, the programme will carry out a number of evaluations that will reinforce its performance. According to the regulations, at least once during the programming period it needs to be evaluated for each priority axis how the ERDF support contributes to the objectives of the relevant priority axis. Reviews of the effectiveness and impact are essential for the attainment of information on the achievement of the programme and allow optimization of the programme during or after the programming period. Such evaluations constitute a core mean to illustrate the effect and benefits of the resources and add to greater transparency in the funding agencies and towards the general public.

The main objectives of the Evaluation Plan of the CP Interreg SI-HU are to:

- improve the quality of evaluations through proper planning, including identification and collection of necessary data,
- provide a framework to plan and implement interim and impact evaluations,
- ensure the availability of all necessary resources for funding and managing the evaluations,
- equip programme bodies with information necessary to facilitate informed programme management and strategic steering of the programme,
- ensure inputs for reporting to the EC on the level of the programme (annual and final implementation reports),
- facilitate the synthesis of findings from different Member States by the EC and from different programmes by the Member States.

2.2 Coverage

As stated in the Art 54 (1) of the CPR as well as in guidance documents from the EC the content of the Evaluation Plan concerns mainly the following areas:

- Evaluations on the efficiency and effectiveness of the programme,
- Impact evaluations.

The geographic area covered by the Evaluation Plan is the programme area, which comprises 4 NUTS 3 regions - statistical regions in Slovenia (Pomurje and Podravje) and counties in Hungary (Vas and Zala counties).

Time-wise coverage of the Evaluation Plan ranges until the year 2023 considering the final implementation report of the programme to be submitted to the EC.

2.3 Existing knowledge

The evaluations should consider the outcomes of previous evaluations and relevant analyses carried out by the programme in period 2007-2013 and during the programming process for the present period. Most of the listed documents are available on the programme website.

The main reference document for the evaluations is the approved <u>CP Interreg V-A Slovenia-Hungary 2014-2020</u>. There the programme strategy, priority axes, objectives, indicators, financing and basic programme structures and procedures are described.

The analysis of the programme area including the SWOT analysis which was carried out by external experts in the course of drafting the CP Interreg V-A Slovenia-Hungary in 2014. The conclusions of this analysis are integrated in Section 1 of the approved CP.

<u>Internal evaluation of the 1st Call of the OP SI-HU 2007-2013</u> and <u>of the 2nd Call of the OP SI-HU 2007-2013</u> prepared by the MA and JTS.

The <u>Final evaluation of OP SI-HU 2007-2013</u> has evaluated alongside several evaluation tasks: direct comparison of programme objectives and results, evaluation of programme/project implementation using the programme/project indicators, evaluation of the programme strategy and analysis of the relevance of project results, evaluation of programme communication activities and functioning of programme structures.

Final report of Ex-Ante evaluation of the Cooperation Programme Slovenia – Hungary 2014-2020 was concluded in 2015 with the aim to provide an external perspective on the preparation of the CP in order to improve and strengthen the quality of the programme and to ensure optimised allocation of resources. External experts evaluated the programme strategy, internal and external coherence, intervention logic, horizontal principles, indicator system and financial allocations.

Strategic Environmental Assessment of the Cooperation Programme Slovenia – Hungary 2014-2020. The first part of the SEA report gives a description of the current state and includes: definition of programme impacts and alternatives and current state of the environment. The second part integrates the above within the description of: environmental objectives and indicators for monitoring whether these objectives will be obtained, criteria set up for the purpose of the assessment and the impact assessment itself, evaluation of the CP

implementation impacts on the environmental objectives, mitigation measures, recommendations and environmental monitoring.

<u>The Methodological document for indicators and performance framework</u>. This document was prepared by the programme for the priority axis 11 with the aim to describe the methodology behind the definition of the indicator baselines. For the priority axis 6c the programme use the official statistical data.

The Communication strategy for Cooperation Programme Interreg V-A Slovenia-Hungary which sets out the objectives of the programme communication, its target groups and partners as well as means to reach them.

3. COORDINATION AND IMPLEMENTATION FRAMEWORK

3.1 Roles and responsibilities

Monitoring Committee

The MC has a controlling and decisive role in the creation and implementation of the Evaluation Plan. All programme partners are represented in the MC and can therefore directly influence the evaluation process.

The MC approves the Evaluation Plan and possible subsequent amendments and revisions that might arise from emerging needs. The MC reviews at least once a year the progress in the implementation of the Evaluation Plan and examines the follow-up given to the findings of the evaluations (Article 110 (1) (b) of CPR). The review of the Evaluation Plan will be combined with the approval of the Annual Implementation Report(s) in which progress made in implementing the Evaluation Plan will be reported.

Managing Authority

In accordance with Article 114(1) CPR, the MA has responsibility to draw up an evaluation plan and submit it to the MC not later than one year after the adoption of the programme. The MA has to submit the evaluation plan, and any of its amendments approved by the MC, to the EC for information.

In accordance with Article 56(3) CPR, during the programme implementation, the MA has to ensure that programme evaluation, including evaluations on the effectiveness, efficiency and impact of the programme, are carried out on the basis of the evaluation plan and that appropriate follow-up measures are taken. The evaluations will assess how support from the ERDF has contributed to the objectives as defined for each programme priority (see table 2). It will ensure that all evaluations are examined by the MC and sent to the EC.

MA represents the strategic guidance to the JS by the implementation of both evaluations on the effectiveness and efficiency and delegate tasks related to coordinating, monitoring and ensuring the quality of evaluation activities throughout the whole evaluation process.

By the implementation of the impact evaluations it is responsible for the transparency and correctness of the tendering procedures for the competent external evaluators. The MA needs to enable the evaluators access to the information needed for conducting evaluations as far as possible.

Joint Secretariat

The functions of the JS include support and execution of all day to day necessary work in the field of evaluation. This includes work in the preparation, coordination and the ongoing revision of the Evaluation Plan and work in the design, coordination and monitoring of evaluations as well as reporting to the MC and the Commission. JS internal evaluation group consisting of four staff members (one is operatively responsible, others are called in upon necessity) is responsible for evaluation related activities in the programme. Participating staff members include those who were in charge of external evaluations already in previously and therefore have insight and understanding of different methodological approaches to evaluation (for example the preparation of the ToRs). These members will implement the evaluations of effectiveness and efficiency (see point 4.2.1). As the focus of these evaluations concerns also the evaluation of the programme management, management of the technical assistance funds etc., the additional control of the results will be ensured by the steering committee with the participation of at least one independent expert from the administration of the MA (e.g. from mainstream programmes from SI and/or HU side).

The JS also supports the external evaluators in gathering the necessary data for evaluations (from the e-Monitoring System (eMS), from beneficiaries, National and Regional Authorities...) and conducts some basic analyses. The JS also takes over the coordinating role between the MA, National/Regional Authorities and evaluators.

Bilateral Programme Group

The operational coordination of the activities of the MA, National Authorities and the JS concerning the evaluations will be carried out through the regular meetings of the Bilateral Programme Group.

Involvement of programme partners

For the purpose of evaluations and participation of competent partners in the programme evaluation a pool of national experts covering the thematic fields of the programme specific objectives may be engaged to provide specific inputs to the programme evaluation, its findings and follow-up measures. They could be the nominated advisors of the MC competent in a certain thematic field or civil servants consulted during the drafting of the Cooperation Programme to establish the baseline values of the programme indicators.

In addition, other programme stakeholders and beneficiaries as well as general public will be contacted for the purpose of impact and operational evaluations through surveys, interviews and consultation events. The findings of the external evaluators will be cross-checked with beneficiaries and stakeholders. The results of evaluations will be shared through the programme communication channels.

3.2 Synergy with other programmes and initiatives

As stated in the Cooperation Programme, the programme will strive to create synergies with other EU programmes, in particular with nationally implemented ESI funds, Interreg and centralised EU programmes. Further synergies will be sought also with relevant macroregional strategies (EU Strategy for Danube Region (EUSDR)). This principle will be followed also in programme evaluation. Therefore evaluators will also consider synergetic effects of operations funded by these different sources in the programme area as far as this will be possible considering the availability of data on both sides of the border. Evaluation reports of nationally implemented ESI funds and other Interreg programmes will be also considered by evaluators.

3.3 Source of evaluation expertise and training

As a general rule the evaluations are conducted by external experts. These experts are functionally independent from the programme bodies (Art. 54 (3) of CPR) and it is foreseen that they will implement the impact evaluations in the years 2020 and 2022.

In addition to the impact evaluations, also the evaluations of effectiveness and efficiency will be carried out. It is foreseen that two of them will be carried out internally by the programme bodies in the years 2017 and 2019, which include smaller status reports at the beginning of the programme implementation or gathering of data for evaluations (for example surveys with beneficiaries and stakeholders regarding the performance of programme bodies, functioning of programme implementation tools, effectiveness of programme communication etc.).

External expertise (in- or out-house) in the implementation of evaluations

As far as necessary the programme should resort to external expertise for the implementation of evaluations, in particular when complex topics are concerned, for example to evaluate the programme impact and sophisticated methodologies are required for the collection and analysis of diverse data. Following the principle of objectivity, external service providers are also more suitable for any evaluations concerning the programme processes and structures.

When selecting external service providers for the execution of evaluations national and EU public procurement rules shall be respected. At the same time, the procedure should allow participation of service providers from both sides of the border. In addition to price, quality criteria shall be applied, which can be set separately for each evaluation. The external service provider shall be in close contact with relevant programme bodies throughout the evaluation process.

Especially due to the limited budget of the programme for evaluations, the programme will also make good use of the independent expert evaluator employed by the Office of the Republic of Slovenia for development and European Cohesion Policy, who will not be involved in implementation and monitoring of the programme.

Internal expertise in the implementation of evaluations

An interactive exchange between the external evaluators and JS is foreseen. The JS will provide external evaluators with relevant data from the programme monitoring system, programme documents, results of any internal analyses and any other relevant information needed to execute the contracted evaluations.

To ensure good knowledge on evaluations necessary for drawing up Terms of Reference of public procurements and to steer and monitor the evaluation process the JS staff will take part in trainings offered, especially by Interact, carry out self-studies and exchange with other programmes.

Flowchart 1: The roles and responsibilities of the involved programme bodies and external experts

Pool of national experts

provides support to the JS

Gathering data for evaluations (key steps in implementation):
publishing call, check of administrative compliance and eligibility,
qualitative assessment of the applications

<u>Sources of data</u>: eMS, public data registers (national statistic offices), project achievements, output indicators, deliverables, financial data

<u>Activities by evaluations of effectiveness and efficiency:</u> data collection and analysis, desk research, surveys, questionnaires

<u>Activities by impact evaluations:</u> provide support and data to the external experts

MA

Gathering data for evaluations (key steps in implementation): strategic guidance for call preparation, contracting

<u>Activities:</u> supervision of evaluations and evaluation reports, suggestions for follow-up measures to be presented to MC, supervision of implementation of follow up measures decided by the MC

External experts

<u>Key steps:</u> to carry out the impact evaluations, preparation of evaluation reports

<u>Sources of data:</u> eMS, public data registers (national statistic offices), project outputs and deliverables

<u>Activities by the impact evaluations:</u> desk research, interviews, surveys, results of evaluations of effectiveness and efficiency, web surveys, feedback questionnaires, SWOT analysis, focus groups, evaluation of results provided through JS analyses, surveys, analyses

controlling and decisive role

Monitoring Committee

3.4 Use and communication of evaluation results

Evaluation results will optimize the programme implementation and achievement of programme objectives; therefore, it is necessary to make them available to programme bodies.

They will be presented and discussed within the MC. The MA and JS will propose to the MC follow- up measures to meet relevant recommendations suggested by the evaluators. The implementation of measures approved by the MC is carried out by relevant programme bodies under the coordination of the MA and supervision of the MC.

Relevant results of evaluations will also be communicated to interested authorities for their use in policy development and decision making as well as to other programme partners and stakeholders.

With regard to the transparency of the programme, the results of the evaluations carried out pursuant to Art. 54 (4) of the CPR will be available to the public. This is foreseen thorough the annual implementation reports, where the results of the evaluations are summarized alongside the progress of the Evaluation Plan (see section 4.1.). The annual implementation reports are published on the programme website. Single evaluation reports will also be published in summary form on the programme website.

As suggested in the EC Guidance Document on Evaluation Plans the evaluation reports accompanied by supporting documents will be uploaded to the SFC and made available to the EC.

3.5 Quality assurance

To ensure quality of programme evaluations, sufficient time will be foreseen to plan and procure evaluations. Specific criteria will be defined in the terms of reference for the selection of evaluation experts. They will relate in particular to competences and expertise in evaluation, in particular evaluation of Cohesion policy and ETC programmes. Evaluators will be required to use a sound methodology in the performance of their tasks. They will also be required to produce inception, interim and final reports on the evaluations carried out. MA with the assistance of the JS will be responsible for quality control of the outsourced evaluation activities.

The MC will be regularly informed about the progress on evaluation activities, their outcomes and will also receive the evaluation reports.

3.6 Financial resources

A total of maximum € 70.000 is available for carrying out evaluations according to the present Evaluation Plan for the outsourced external evaluator. The financing of trainings and in house external experts is foreseen from other technical assistance budget lines and is not part of the evaluation budget.

4. TIMING AND PLANNED EVALUATIONS

4.1 Timeline

For the planned evaluations a schedule has been created, which is presented below. According to the Guidance Document of the EC, all information on evaluations that are planned more than three years in advance should be regarded as indicative.

Since results of evaluations are gathered in different reports that need to be submitted to the EC, the schedule below also shows how evaluations feed into these reports.

Table 1: Timeline of reporting about programme implementation and planned evaluations feeding into those reports

4.2 Planned evaluations

4.2.1. Evaluation of efficiency and effectiveness of the programme

The purpose of this evaluation is to assess effectiveness and efficiency of the programme management system and programme implementation. <u>Efficiency</u> refers to the use of financial/administrative resources in relation to outputs and results. <u>Effectiveness</u> refers to the degree to which set objectives and targets are achieved. As indicated below effectiveness will be only evaluated in the second evaluation planned for the first half of 2019, when some projects will be closed already and effects of their achievements could be compared with the planned objectives and results.

Timing

Evaluation of efficiency and effectiveness of the programme will be performed two times during the programme duration. First one in beginning of 2017, to feed the AIR 2016 and the second one in beginning of 2019, to feed the AIR 2018.

Focus of the evaluation I.

- programme management and implementation
- project application, selection procedures
- Communication Strategy

General guiding questions

The indicative guiding questions are available in the table below and will be defined in more detail in the Terms of Reference.

- How efficient is the programme structure?
- How efficient and effective are the programme procedures?
- How user friendly are programme procedures and forms?
- In how far was simplification and harmonisation of procedures achieved?
- Are there any improvements necessary in the programme procedures?
- Are there any bottlenecks identified in programme procedures and how could they be surpassed?
- What is the progress of the programme towards achieving the targets of the specific objectives?
- What is the progress in implementation of communication strategy and achievement of the set objectives?

Focus of the evaluation II.

- programme management and implementation
- management of technical assistance funds
- project reporting and reimbursement procedures

EVALUATION PLAN

- first thematic achievements
- analysis of partnerships
- performance framework milestone 2018

General guiding questions

Further indicative guiding questions are available in the table below and will be defined in more detail in the Terms of Reference.

- How efficient is the programme structure?
- How efficient and effective are the programme procedures?
- How user friendly are programme procedures and forms?
- In how far was simplification and harmonisation of procedures achieved?
- Are there any improvements necessary in the programme procedures?
- Are there any bottlenecks identified in programme procedures and how could they be surpassed?
- What is the progress of the programme towards achieving the targets of the specific objectives?
- What are the highlights of project implementation?
- What are the features of the partnerships? Do they reflect the expectations of the programme.
- What is the progress in implementation of communication strategy and achievement of the set objectives?
- How is the programme perceived by target groups, especially relevant stakeholders and the general public?

Sources of data

- eMS
- as defined in Methodology for monitoring of programme result indicators
- public data registers (national statistic offices)
- public data sources provided through the pool of national experts (see point 3.1.)
 if applicable
- project outputs and deliverables

Possible methods

- data collection and analysis
- desk research
- surveys
- feedback questionnaires

Data collected by the MA and JS through the regular progress monitoring of projects (including information on project achievements, output indicators, performance framework and financial data) and documented within the programme monitoring system will serve as relevant input for both types of evaluations.

4.2.2. Impact evaluations

Impact evaluation assesses how the support from the ERDF has contributed to the objectives for each priority axis. The impact of the programme shall be evaluated and disentangled from any other trends and developments in the programme area.

Timing

By 2020 a significant number of project results will be available, therefore impact evaluation I will be carried out by the beginning of 2020. Its results will be included in the AIR 2020 and will also be used for the programming of the next financial period. Impact evaluation II will be carried out until the beginning of 2022. Its results will feed into the AIR 2022 and the Summary report.

Focus of the evaluation I. and II.

It is the focus of the evaluation to assess the impact of the programme on the programme area by evaluating it apart from other trends and developments in the region. It should capture the effects of the programme as a whole and its performance as regards each specific objective. In more detail the evaluations will focus on:

- Impact evaluation of priority axes 1-2
- result indicator values by beginning of 2020 and 2022 respectively
- target groups, indicative activities and types of beneficiaries
- guiding principles
- horizontal principles
- (socio-economic and SWOT analysis of the programme area by the beginning of 2020)
- contribution to the EU 2020 Strategy
- Communication Strategy

General guiding questions

Further indicative guiding questions, including questions by specific objective, are available in the table below and will be defined in more detail in the Terms of Reference.

- How well are the project objectives, outputs and results aligned with expectations of the programme as set in the CP (intervention logic)?
- What is the progress of the programme towards achieving the targets of the specific objectives in terms of expected results, activities, target groups, types of beneficiaries and indicators?
- What change was achieved in the programme area in terms of meeting the needs and challenges of the programme area as identified in CP 2014-2020 (considering the scope and characteristics of the programme)?
- Identification of gaps between what was achieved and what are the remaining/emerging needs of the area at the time of the evaluation.

- How well did guiding principles lead the projects towards expectations of the programme?
- How well was the integrated approach to territorial development followed?
- How well was the territorial balance respected?

Sources of data

- eMS
- as defined in Methodology for monitoring of programme result indicators
- web surveys
- public data registers (national statistic offices)
- public data sources provided through the pool of national experts (see point 3.1.) if applicable
- project outputs and deliverables

Possible methods

A theory-based approach as defined in the EC Guidance Document will be used for the impact evaluation. This approach follows each step of the intervention logic identifying causal links and mechanisms of change, answering the question why and how an intervention works.

- desk research
- interviews
- surveys
- feedback questionnaires
- SWOT analysis
- focus groups

Table 2: Summary of planned evaluations and evaluation questions

Deadline	Reporting of the programm e implement -tation	Evaluation theme	Subject of the evaluation	Methods	Indicative evaluation questions
